

Montpellier, France – Dec. 12, 2005

HEREDIS MAC X.2

The genealogy standard for MAC OS X

BSD Concept, the popular French Genealogy software editor, will launch a new English version for Mac.

Heredis Mac X.2 includes all the Mac OS X technologies and allows the genealogist to make interactivity between its Heredis and its Mac with now iApps® integration.

With a simple drag and drop you can now add a medium to your genealogy from iPhoto® and on each media parts of Heredis MAC X.2. It also allows you the exportation of all the dating genealogical events to iCal® and a whole genealogy file in VCard format give a clever integration with Mac OS X and make the genealogy livelier.

By publishing and exchanging their genealogy research online, genealogists are confronted with the data publications. Heredis Mac X.2 offers a fusion tool of individuals simple and clever, who let you choose the information that you want to conserve whoever their attached to and fusion them entirely.

One of this program greatest strength is its ability to create an assortment of attractive, fully customizable charts. Heredis MAC X.2 will build a family tree you will be proud to hang on your wall. In this version, you can have a drawing tree in 4 and 5 generations. Henceforth, the genealogist can export its tickets (ancestry, patronymic, alphabetical,...) in text tab format to make Excel Import easier.
